## EDUCATION

### FRONTEND DEVELOPER

2023 - 2025

SheCodes

- Focus: Advanced React development, state management, and Web Accessibility.
- Scope: Completed four intensive certifications covering the full development lifecycle, with an emphasis on clean code, modular responsive UI design, and SEO optimization.

### MA CULTURE, COMMUNICATION AND GLOBALIZATION

2013 - 2016

Aalborg University

### BA PHILOLOGIST IN ENGLISH

2010 - 2013

Kodolányi János University

## ABOUT ME

Adaptable Frontend Developer with a decade of experience in international project management and operations. After years of managing complex systems and high-stakes technical documentation, I have transitioned my focus to modern web technologies. I combine the analytical rigour of a professional lead with a developer's focus on building clean, maintainable, and user-centric interfaces.

I specialize in bridging the gap between project requirements and scalable technical solutions. Having coordinated cross-departmental initiatives, I bring a senior mindset to development teams by balancing the ability to solve problems independently with a strong commitment to collaborative, high-fidelity delivery.

## TECHNICAL SKILLS

**Frontend:** React, JavaScript, HTML, CSS, Tailwind

**Tools & Environment:** VS Code, Supabase, Storybook, Browser DevTools

**Workflow:** Git/GitHub, Agile/Scrum, Design-to-Code Implementation

**Professional:** Technical Docs, Project Management, Team Collaboration

## WORK EXPERIENCE

### TEAM COORDINATOR, LOGISTICS

PWT Brands | Aalborg, Denmark | 01/2020 - 10/2025

- Managed high-velocity operations with a focus on 100% data accuracy, overseeing the logic and integrity of complex operational data pipelines.
- Collaborated with technical teams to analyze bottlenecks and implement process improvements, significantly reducing operational downtime.
- Partnered with cross-functional departments to standardize communication and ensure the precise delivery of project objectives.

### OPERATIONS COORDINATOR, LOGISTICS

PWT Brands | Aalborg, Denmark | 01/2019 - 01/2020

- Managed logistics and warehousing data with a focus on 100% accuracy.
- Reduced operational errors by implementing data-driven workflow improvements.

### LOCALIZATION SPECIALIST - FREELANCE

Zoo Digital | Remote | 01/2019 - 12/2024

- Managed high-pressure, remote projects for global clients, delivering precise technical translations and subtitles under strict deadlines.

### INTERNATIONAL PROJECT MANAGER

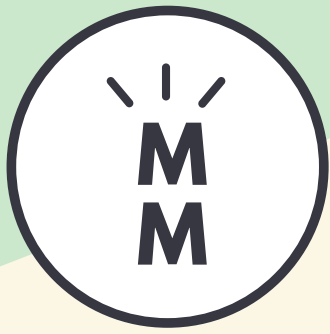

InterCollege | Aalborg, Denmark | 07/2014 - 12/2018

- Authored high-stakes grant applications and compliance reports, translating complex data into structured documentation.
- Managed EU-funded projects (Erasmus+) under strict regulatory frameworks, budgets, and rigid deadlines.
- Led cross-functional teams and workshops to translate high-level requirements into actionable workflows.

### PROJECT MANAGEMENT INTERN

InterCollege ApS | Aalborg, Denmark | 01/2014 - 07/2014

- Assisted with EU project proposals and coordinated team activities.
- Supported senior team members with admin tasks and research.

# LILLA TÓTH

Frontend Developer

## QUICK SNIPPETS

Coffee-to-Code Ratio: Very low; I run on stubbornness and pastries.

Logistics Superpower: Chaos Coordination. Turning "too many moving parts, too little time" situations into structured, repeatable workflows.

Current Goal: Leveling up in TypeScript and exploring the Vue ecosystem.

Favorite Tool: Chrome DevTools (the "Inspect" element is my best friend for debugging).

Analog Mode: A thrilling book and a record on the turntable.

## PROJECTS

### INTERACTIVE MEMBER DIRECTORY | CHINGU VOYAGE | TYPESCRIPT, REACT

- Developed a Data Visualization Dashboard featuring a dual-view interface: a searchable directory and a dynamic Geospatial Globe for member locations.
- Engineered complex filtering logic to sort user data by multiple parameters (country, age, gender) while maintaining UI performance.
- Collaborated in a remote Agile environment, utilizing TypeScript and Git/GitHub to manage sprints and ensure codebase stability.
- Maintained high code standards through active participation in peer code reviews and collaborative task distribution.

### JOB APPLICATION TRACKER | REACT, SUPABASE, TAILWIND

- Engineered a robust CRUD application using Supabase (PostgreSQL) for real-time data persistence and secure state management across the application lifecycle.
- Developed custom filtering and dynamic sorting logic, enabling users to navigate large datasets with immediate UI feedback and zero latency.
- Designed a high-scannability "Command Center" interface that handles complex user inputs, mimicking the efficiency of professional enterprise-level dashboards.
- Optimized the layout for cross-device functionality, ensuring the tool remains responsive for quick updates—leveraging my background in coordinating high-velocity operational data.

### HIGH-FIDELITY UI RE-CREATION | HTML, VANILLA CSS

- Replicated a complex Figma design with high visual accuracy, ensuring precise alignment of spacing, typography, and layout specifications.
- Engineered a fully responsive layout using CSS Flexbox and Grid, achieving seamless transitions across ultra-wide, desktop, and mobile breakpoints.
- Optimized for performance using Vanilla CSS to minimize the rendering path, resulting in a lightweight product with zero external dependencies.
- Implemented semantic HTML5 and accessible design patterns, including keyboard navigability and high color contrast.
