# LILLA TÓTH

*Front-end Developer*

## CONTACT

- ✉ lilla.toth216@gmail.com
- ☎ +45 50 29 33 28
- 🌐 lilla-frontend.netlify.app
- ⌂ Aalborg, Denmark

## EDUCATION

### SHECODES FRONT-END DEVELOPMENT

*2023 - 2024*

- Focus: Advanced React development, state management, and building for Web Accessibility (a11y).
- Scope: Successfully completed four intensive certifications covering the full development lifecycle, from UI design to cloud deployment and SEO optimization.

### MA CULTURE, COMMUNICATION, AND GLOBALIZATION

*2013 - 2016*

Aalborg University

### BA PHILOLOGIST IN ENGLISH

*2010 - 2013*

Kodolányi János University

## LANGUAGES

Hungarian - native
English - fluent
Danish - proficient

## PROFILE

Front-end Developer with over 10 years of professional experience in Logistics Operations and International Project Management. Specialist in building responsive React applications with a focus on UI fidelity and data integrity. I bridge the gap between complex operational workflows and intuitive digital interfaces, bringing a senior-level professional maturity to engineering teams.

## TECHNICAL SKILLS

**Core:** React, JavaScript (ES6+), HTML5, CSS3/Tailwind
**Data & Tools:** Supabase (PostgreSQL), Git, Figma, VueJS (currently upskilling)
**Domain:** Logistics Workflow Optimization, Agile/Scrum, Project Management

## WORK EXPERIENCE

### TEAM COORDINATOR, LOGISTICS

*PWT Brands | Aalborg, Denmark | 01/2020 – 10/2025*

- Managed high-velocity operations for teams of 5–15, overseeing quality control and ensuring 100% data accuracy in incoming goods processing.
- Collaborated with optimization specialists to analyze workflow bottlenecks and implemented process improvements that reduced operational downtime.
- Enhanced cross-department communication to support project delivery.

### OPERATIONS COORDINATOR

*PWT Brands | Aalborg, Denmark | 01/2019 – 01/2020*

- Oversaw transport, warehousing, and distribution while maintaining high efficiency.
- Streamlined processes and reduced errors through data-driven improvements.

### FREELANCE TRANSLATOR & SUBTITLER

*Remote | 01/2019 – Present*

- Managed high-pressure, remote projects for global clients, delivering precise technical translations and subtitles under strict deadlines.
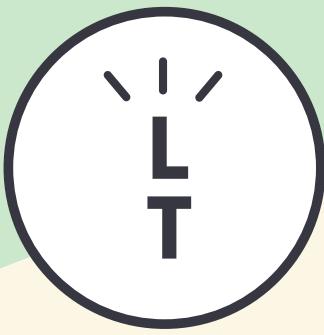

### INTERNATIONAL PROJECT MANAGER

*InterCollege ApS | Aalborg, Denmark | 07/2014 – 12/2018*

- Managed EU-funded educational projects, ensuring compliance with deadlines and budgets.
- Led teams and facilitated workshops and events for 20–60 participants.
- Coordinated with internal and external partners to deliver project objectives.

### PROJECT MANAGER INTERN

*InterCollege ApS | Aalborg, Denmark | 01/2014 – 07/2014*

- Assisted with EU project proposals and coordinated team activities.
- Supported senior team members with admin tasks and research.

# LILLA TÓTH

*Front-end Developer*

## QUICK SNIPPETS

Coffee-to-Code Ratio: Very low, I run on stubbornness and pastries.

Logistics Superpower: Chaos Coordination. Turning a "too many trucks, too little time" situation into a structured plan.

Current Goal: Polishing my TypeScript and exploring Vue.

Favorite Tool: The "Inspect" element (and a good keyboard).

Analog Mode: A thrilling book and a record on the turntable.

## PROJECTS

### INTERACTIVE MEMBER DIRECTORY | CHINGU VOYAGE | TYPESCRIPT, REACT

- Developed a Data Visualization Dashboard to manage and display member data.
- Built a dual-view interface: a searchable/filterable directory for member profiles and a Geospatial Map (Globe) that dynamically rendered member locations.
- Handled complex data filtering logic to sort users by country, gender, and age.
- Collaborated in a remote Agile team, using TypeScript to ensure codebase stability.
- Actively participated in Peer Code Reviews, providing and receiving feedback to maintain high code standards and team velocity.
- Managed task distribution using GitHub Projects (Kanban), ensuring all sprint goals were met within the 6-week timeframe.

### HIGH-FIDELITY UI RE-CREATION | HTML, VANILLA CSS

- Replicated a multi-section, complex Figma design with a focus on high-fidelity visual accuracy, ensuring every padding, margin, and font-weight matched the original specification.
- Engineered a "Mobile-First" layout using CSS Flexbox and Grid, achieving seamless transitions across ultra-wide, desktop, tablet, and mobile breakpoints without UI breakage.
- Opted for Vanilla CSS over frameworks to minimize the critical rendering path, resulting in a lightweight, high-performance product with zero external dependencies.
- Implemented semantic HTML5 tags and ensured high color contrast and keyboard navigability, aligning with modern web standards.

### JOB APPLICATION TRACKER | REACT, SUPABASE, TAILWIND

- Engineered a robust CRUD application using Supabase (PostgreSQL) to manage the end-to-end lifecycle of job applications, ensuring real-time data persistence and secure state management.
- Developed custom logic for multi-criteria filtering and dynamic sorting, allowing users to navigate large datasets with zero latency.
- Designed a responsive "Command Center" interface that handles complex user inputs (Add, Edit, Delete) with immediate UI feedback, mimicking professional enterprise-level dashboards.
- Prioritized data scannability and mobile-first responsiveness, ensuring the tool remains functional for "on-the-go" updates—a direct application of my background in high-velocity logistics coordination.
